

# FARHAN ABDULLAH PC

## FLUTTER DEVELOPER

+91 9074139842 | farhanabdullahpc01@gmail.com | LinkedIn | GitHub | Portfolio

### PROFILE SUMMARY

Dedicated autodidact Flutter developer with 3+ years of hands-on experience in building cross-platform applications using Flutter and Dart. Skilled in Firebase integration, RESTful APIs, and advanced state management with Bloc. Eager to contribute innovative solutions in the ever-evolving field of mobile app development.

### TECHNICAL SKILLS

Programming Language	: C, C++, Python, Dart, Java, JavaScript
Frontend Development	: Flutter, HTML, CSS , Next JS
Backend Development	: REST API
Database and Storage	: Firebase, Mongo DB, Cloudinary, AWS amplify, Hive, SQLite
State Management	: Bloc, Riverpoad, Provider, GetX
Integration	: Google API, Razorpay, Gemini API
Familiar with	: Domain Driven Design (DDD), Architecture, SOLID Principles, Data Structures
Tools	: Playstore, Apple Store, GoDaddy, AWS Cloud Panel, Clerk.com,Unity Ads, Google Cloud, Admob, Figma, Canva, Git, GitHub, Postman, Razorpay, Stripe

### EXPERIENCE

- Flutter Developer – Growblic Pvt. Ltd.

(2+ Year)

Developing cross-platform mobile applications for Android, iOS, TV, and Wear OS using Flutter and Firebase. Focused on real-time communication, gaming features, and performance optimization.
- Flutter Developer – MalabarSoft LLP.

(1+ Year)

Worked on mobile app development using Flutter and Firebase, contributing to UI design, feature integration, and app deployment.

### PROJECTS

- Growblic – Financial Application

Play Store — App Store

A cross-platform financial gaming app featuring mini-games, real-time chat, and coin-sharing. Deployed on Android, iOS, Android TV, and Wear OS.

- Solely coordinated and developed the complete project — handling UI/UX, backend integration, and deployment across all platforms.
  - Built using **Flutter** with **Bloc** architecture for modular, scalable, and adaptive UI design.
  - Integrated secure **Firebase Authentication**, **Firestore Database**, and **Cloud Messaging** for real-time updates.
  - Developed a seamless **REST API** backend and implemented in-app features like chat, notifications, and coin-sharing systems.
  - Technologies Used:** Flutter, REST API, Firebase, Firestore, Bloc, Cloud Messaging, Git

---

## PairUp Meet – Dating Application

[Live](#)

A Flutter-based dating app offering matchmaking, real-time chat, and user profile customization.

- Implemented matchmaking algorithm based on interests and location.
  - Integrated **Firestore Authentication** and **Cloud Firestore**.
- 

## Bismi App – Tailors Management Application

(Internal Project)

Developed under **Bismi Uniforms LLC**, this Flutter-based tailoring management system is successfully used internally by employees for handling client orders, storing measurement details, and maintaining digital records through PDF documentation.

- Implemented digital measurement tracking and PDF documentation for uniform orders.
  - Integrated **Firestore** for authentication and cloud synchronization.
  - Utilized **Hive Storage** for efficient local data management and offline access.
  - Designed responsive and intuitive UI for employee-friendly workflow.
- 

## SocioConnect Application

[Live](#)

A smart community management app that connects apartment residents, caretakers, and owners for seamless communication and service coordination.

- Developed features for **real-time communication** between residents, caretakers, and owners using **Firestore**.
  - Enabled service request and task tracking system for **caretaker management and maintenance updates**.
  - Implemented **Bloc state management** to ensure organized data flow and responsive UI updates.
- 

## PayRoll + HR Management App

[Live](#)

A business-oriented payroll management solution for automating salary, attendance, and HR operations.

- Integrated secure **Firestore Auth** for role-based login (Admin, HR, Employee).
  - Managed salary and attendance data with **Cloud Firestore**.
  - Developed dashboard analytics and reporting interface using **Flutter Charts**.
- 

## Jeev Setu – Farmer Support Application

[Live](#)

A digital platform that connects farmers, buyers, and agricultural experts for efficient crop management.

- Developed marketplace features using **Firestore**.
  - Added location-based crop discovery using **Google Maps API**.
- 

## Trip Twist – Online Travel Booking Application

[Live](#) — [GitHub](#)

A comprehensive travel booking platform for users, admins, and travel agencies.

- Developed with **Flutter framework** and **Bloc state management**.
  - Integrated **Google Maps API** with autocomplete for location services.
  - Utilized **Cloud Firestore** and **Firestore Storage** for scalable data handling.
- 

## CERTIFICATION

---

### Introduction to Programming Using Python
